

RE: APPLICATION LETTER FOR SPONSERSHIP

DEAR AEP (AFRICAN EDUCATION PROGRAM).

My name is Febby Choombe, I'm in my 11th grade at Kafue day high school, I'm aged 17 yrs. I'm a good member of AEC. I will no doubt go on in grade 12 next year. Only through your Sponsorship if God's willing coming to my academic work I may say I'm atleast doing fine. I say so because in my favourite subject I got a distinction and that is in science which actually involves physics and chemistry. A second distinction in accounts, the last mock exam I got 22 points. Even though in some subjects I did well but I'm not satisfied with them. I'm aiming to have atleast 10-6 points this term.

During my free time apart from studying and doing the house chores I like making friends and singing gospel music. I live with my grandmother and my aunt, including my siblings. I don't live with my mother, because she's mentally ill she's being kept in Lusaka, Chinama. This is a place where they keep people who are mentally sick. My aim is to actually help her when I complete my education. I can only do that still through your help. I really want to help my mother because she's the one who caused my birth, I can't still be watching her suffer like that despite the fact that I'm alive and I know that there are people there who are indeed willing to help people like me in this situation. When I complete my education I want to study psychology, so that I can know what caused my mother's illness. Some time I usually think that if my dad was there he would do something about it, now it's my burden to

actually do some thing. It was indeed my happiness
to know that there are people like you the
(African Education program), who are eager to
help. I ^{am} ~~make~~ applying this letter, and I would be
indeed grateful if my application letter is
considerably accepted.

yours

faithfully

Febby.
